

## Assessment in an AI world: Designing Interdisciplinary Units with Reflection at the Core (EN)

**Steven Varty (SJ)**

High School Head of Biology

/ Biology Teacher

**Chris Warren (SJ)**

High School Director of

IB / Economics Teacher

### Description:

Teachers will be introduced to the basics of interdisciplinary unit design with a focus on embedding student reflection and leveraging AI tools. Participants will explore AI's role in both facilitating unit creation, student usage and enhancing student reflection throughout the learning process.

### Outcome:

- awareness of skills to develop in an AI dominated world,
- ideas of how to utilise AI to create interdisciplinary projects,
- ideas of how assessment may change in a future where content knowledge takes a back seat.
